

Puppy Socialization Safety Guidelines

Work closely with your veterinarian and keep your puppy current on his vaccinations.

Wait at least 7 days after your puppy's first set of vaccinations before you go to a new Place.

Pick a puppy class provider that: A) uses disinfectant to clean waste, and B) requires proof of vaccination.

Until your puppy is fully vaccinated, avoid areas where dogs of unknown vaccination status go to the bathroom.

- PUPPY-FRIENDLY?
 - HEALTHY?
 - VACCINATED?
- = OK TO PLAY!

Only let your puppy interact with other dogs that are friendly, healthy and current on their vaccinations.

Stay away from dog parks until your puppy is fully vaccinated and at least 6 months old.

Always be ready to remove your puppy from situations that overwhelm him.

If your puppy is sick, contact your vet and keep him away from other dogs.
